

SUPPORT FOR THE FIGHT AGAINST COVID-19

VALERO ENERGY MAKES A \$100,000 DONATION TO THE FOUR HOSPITALS DESIGNATED TO TREAT PATIENTS DIAGNOSED WITH COVID-19

MONTREAL, March 16, 2020 — With the goal of supporting the health care workers in the treatment of patients diagnosed with COVID-19 in Quebec, Valero Energy is donating a total of \$100,000 to the foundations of the four designated hospitals in Montreal and Quebec City.

“It’s important for us to lend a hand in this period of imminent crisis. Judging from the international experience so far, it is clear that the health care network in Quebec will very soon be seriously challenged. Collectively, we must do all we can to lend a hand to those first line responders,” said Louis-Philippe Gariépy, Director, Public & Government Affairs — Canada, at Valero Energy.

The four \$25,000 donations will be made through the Valero Energy Foundation of Canada to the respective foundation of following hospitals:

Montreal:

- Jewish General Hospital
- Centre hospitalier universitaire Ste-Justine

Quebec City:

- Centre hospitalier universitaire de l’Université Laval
- Institut universitaire de cardiologie et de pneumologie

“All businesses in Quebec, big or small, are affected. In today’s context, organisations are striving to change the way they do things in order to preserve the health of their employees while doing their best to ensure the continuity of their operations. Regardless, we encourage all companies to support this effort, within their means and resources, whenever they can,” concluded Mr. Gariépy.
